

# MAXPage Light

for Churches

Integrate. Automate. Communicate.

## Real Time Communications and Connectivity When Every Second Counts

- » Easy to Use
- » Discreet Church Paging System
- » Give Parents Peace of Mind
- » Eliminates Noisy Overhead Paging
- » Suitable For Any Sized Church

### Easy to Use

MAXPage Lite is a compact, ready-to-use, desktop paging system that is easy to install and operate. Featuring a very familiar telephone style keypad and large backlit display, users simply key in the pager number and press send - it's that simple!

### Discreet Church Paging System

With the MAXPage Lite system you are able to discretely contact parents during church service. You have the choice to supply your parents with a variety of pagers, from standard clip on pagers to coaster pagers. The pagers are light-weight, small enough to fit into any pocket and come with a handy belt clip and chain - making them harder for parents to lose.

When a parent receives a message or an alert, the pagers can either light up or vibrate. This means that parents are alerted without disturbing other parishioners and interrupting the service.

### Give Parents Peace of Mind

Parents can enjoy church service with the knowledge that if there is an issue with their child they will be contacted immediately and discreetly.

### Suitable for any Sized Church

The extremely flexible MAXPage Lite paging system will suit the needs of churches of any size. With the ability to contact up to 1000 pagers from one unit, your church could combine several units, creating no limit on the number of parents you can contact.
